CONNECTIVITY OPTIONS

~~i. Mobile~~

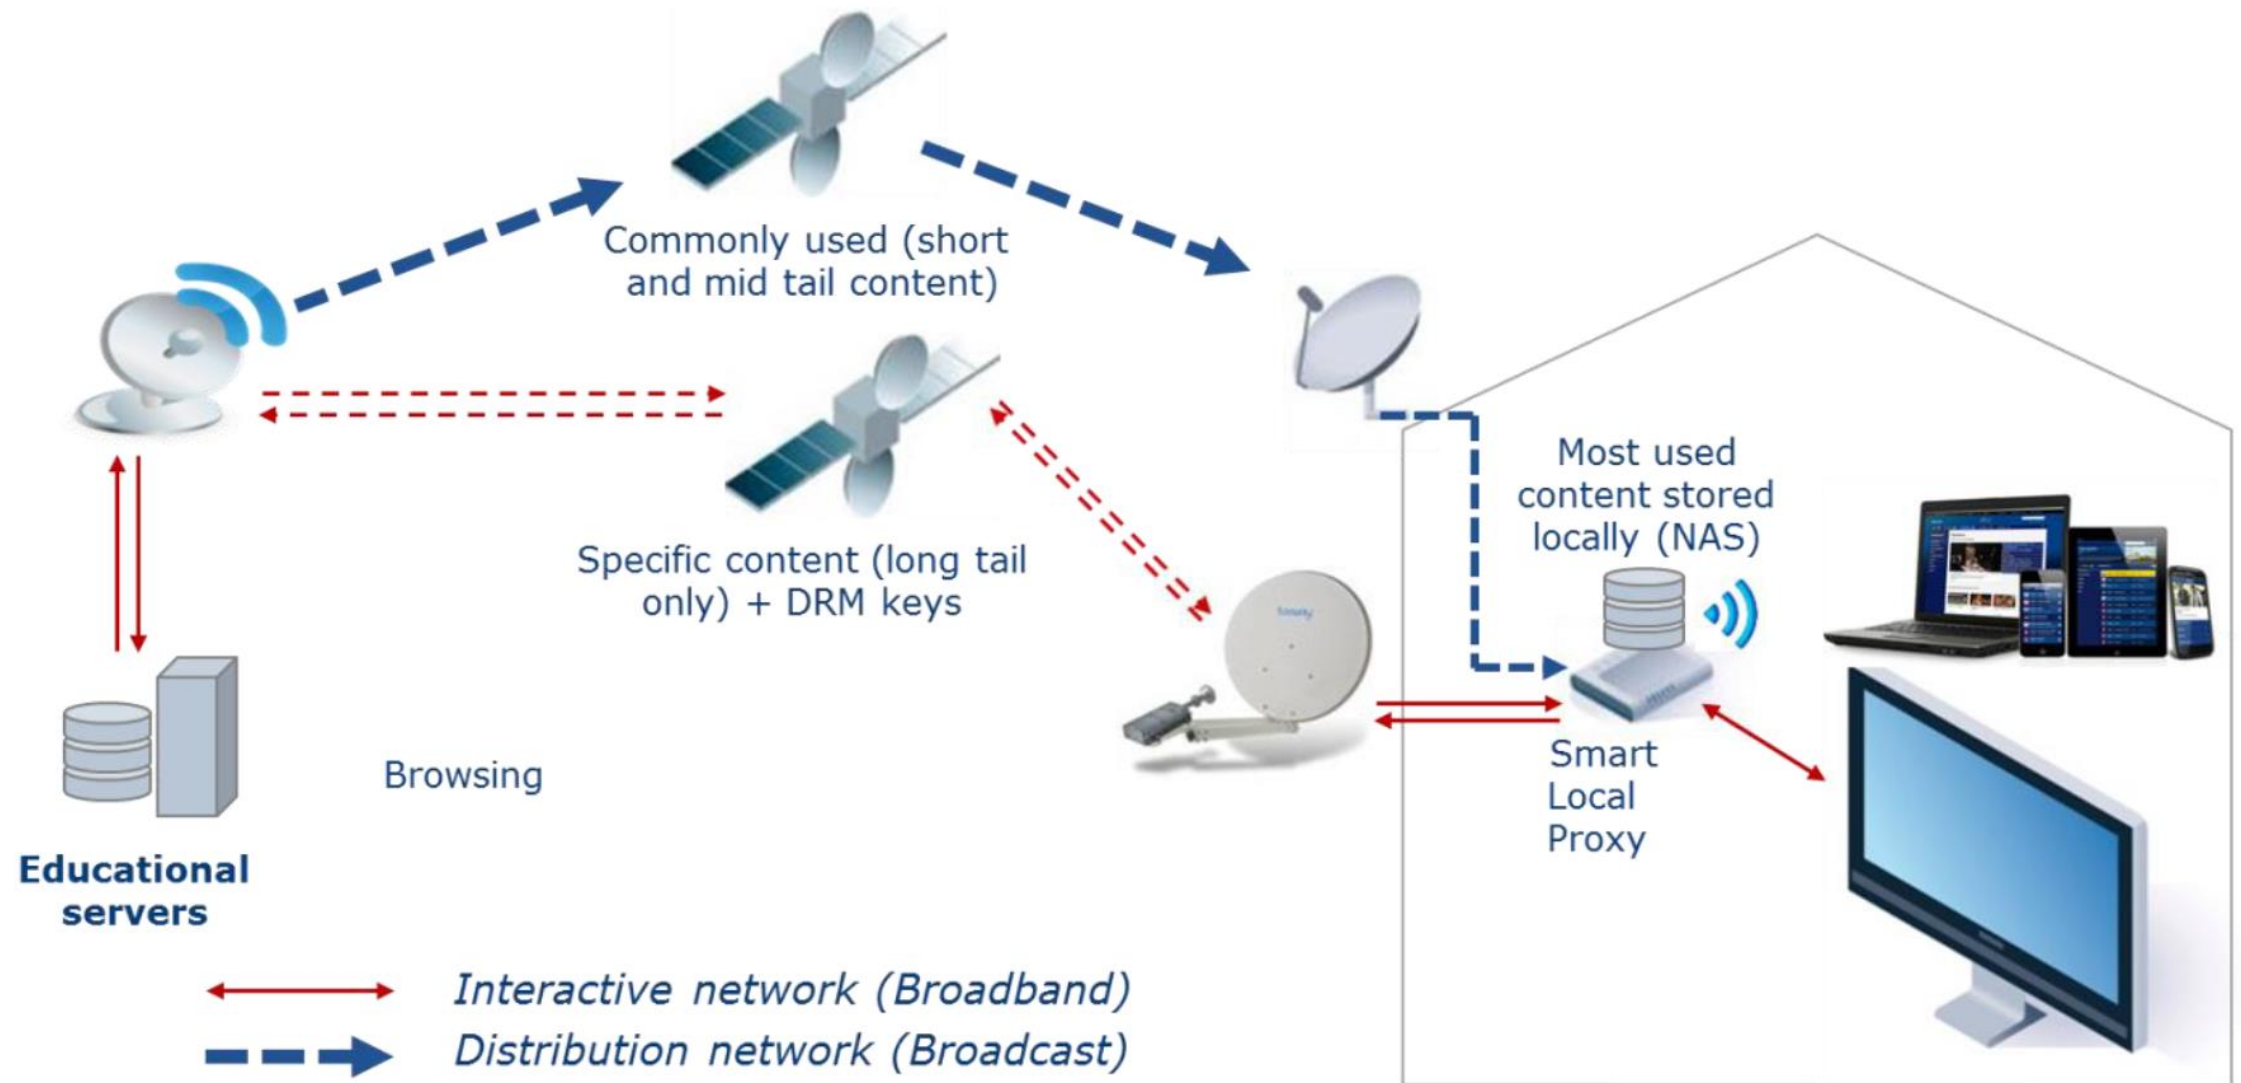

~~ii. Fibre~~

~~iii. Terrestrial (UHF & Microwave Relays)~~

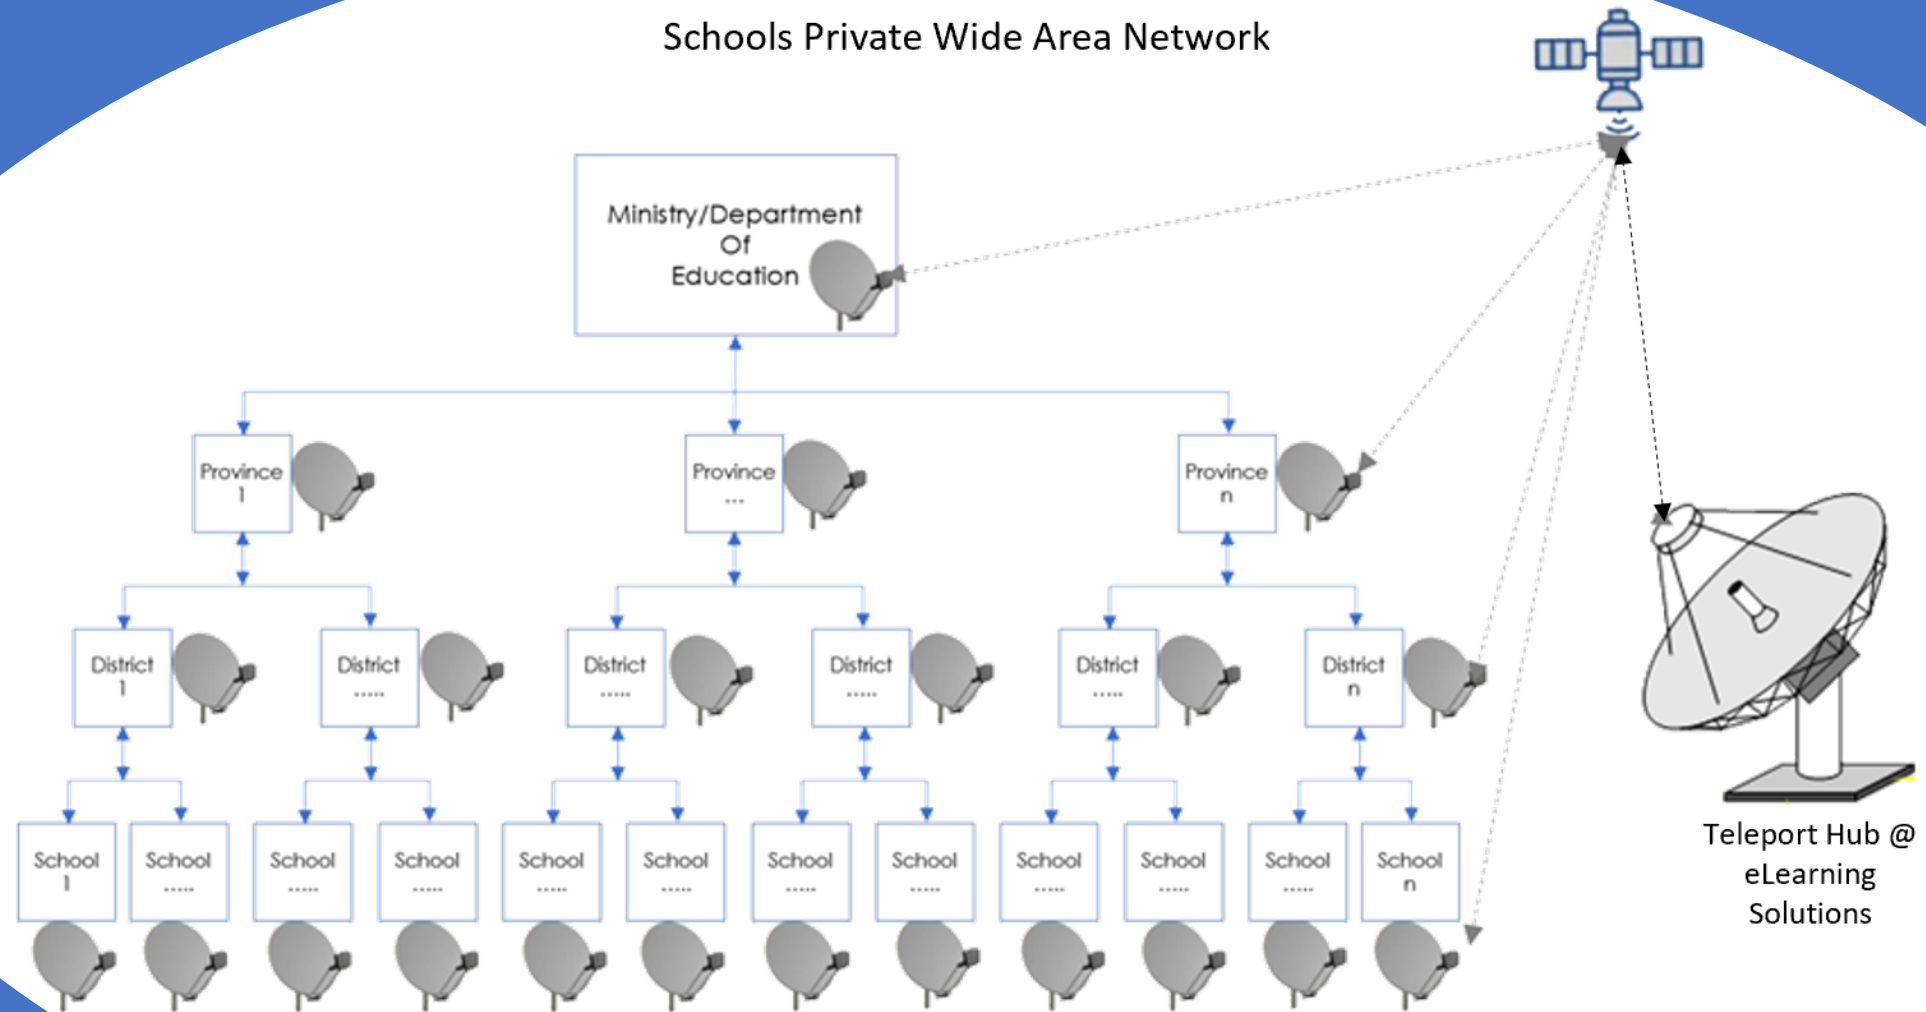

~~iv. Copper~~

v. VSat

Hybrid broadcast-broadband satellite system for schools

Schools Private Wide Area Network

UBIQUITOUS ACCESS TO BROADBAND

Challenges

- i. High bandwidth costs
- ii. Interoperability and interactivity

Solutions

- i. Hybrid Configuration (Multicasting & Unicasting)
- ii. IRMS (Internet Relay Media Server)

Typical cost per leased transponder (36 MHz)		1.5 M€ / year
Bit rate per transponder (27.5 MSps ²⁵ , 8-PSK 2/3)		53 Mbps
Cost per GB		7.18 €
One hour of HD content at 6 Mbps (MPEG-4/AVC)		2.7 GB
Cost per hour of HD content	Overall	19.38 €
	Per school, assuming delivery to 1000 schools	1.94 cents
One hour of UHD content at 15Mbps (HEVC)		6.75 GB
Cost per hour of UHD content	Overall	48.46 €
	Per school, assuming delivery to 1000 schools	4.84 cents

Table 5: Example of cost for the delivery of high-quality content to schools using broadcast satellite.
