TAFIKA

TRUST US TO ALWAYS GET YOU THERE

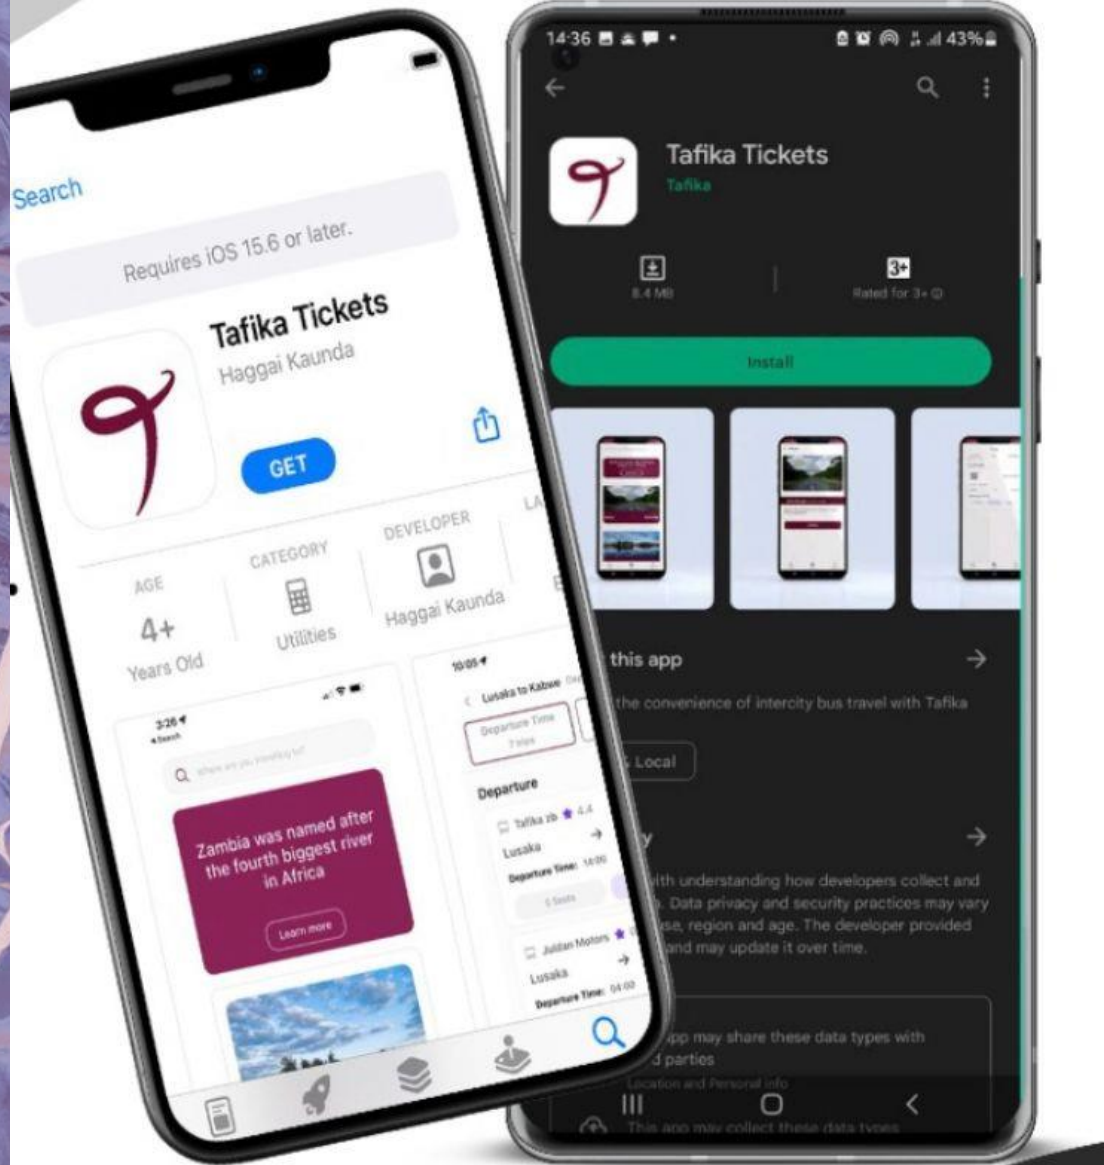

Tafika Tickets is an online ticketing Platform which allows for travellers to pre-book and purchase their intercity bus tickets using mobile money Transactions all within a mobile application,

The Challenge:

- Absence of a digital technology to facilitate bookings for intercity bus travel, making the bus terminus the only point of sell for bus tickets.
- At the same time, Lack of a database for operators to track valuable information such as customer reviews and satisfaction

Our Solution

We developed a mobile application to offer an online marketplace for bus partners that allows travellers to purchase their tickets online using mobile money. We also extended our software to help bus operators track their sales, formulate customer analytics and essentially centralize their operations data.
